# Airbus Protect, advanced cyber security solutions

We help critical infrastructure and industry to build and maintain persistent CyberResilience for the interconnected industrial systems of tomorrow.

By connecting production and control systems which were traditionally isolated, digitalisation is paving the way for large efficiency gains. As it becomes much easier to measure and control remotely in real time, digital production processes will also increase quality, agility and flexibility with enhanced customer focus and reduced cost.

At the same time, **OT systems** become exposed to the very tangible threat of cyber-attacks. Based on our experience, we offer various modular solutions for achieving the "CyberResilience for Tomorrow" our customers need. Our portfolio is tailored to the needs of: critical infrastructure, industrial systems and shop floors, environments we at Airbus are very much familiar with.

## we support you to:

- > Reduce the complexity
- > Understand the risks and priorities
- > Design and implement the risk mitigation measures
- > Comply with regulations
- > Enable industrial innovations
- > Stay focused on your core business

## what differentiate us:

- > many years of experience in the **implementation + operation** of security solutions in sensitive areas
- > industry-specific know-how for **critical and complex infrastructure** and production environments
- > comprehensive and integrated **services**, as well as **technology solutions** from Airbus + Airbus partners, flexibly tailored to your requirements

# CyberResilience for your needs

with an industry proven step approach.

## Assess

gain visibility of your critical assets and receive recommendations to mitigate the identified risks

### \* OT Asset Discovery & Analysis

Passive (and optional active) technical observation and analysis of your industrial network to get a comprehensive overview of OT assets and existing vulnerabilities

### \* OT Security Maturity Check

Compact assessment helps gain an overview of the maturity level of implemented security controls and get recommendations considering people, process and technology dimensions

### \* OT Security Pentesting

Vulnerability assessment + passive security testing of industrial network, to gain clarity on vulnerabilities and confirm the efficiency of OT security measures

### \* OT Security Risk Assessment

A comprehensive understanding of the risks in your OT environment based on a business impact and likelihood, to achieve a business aligned decision basis for your Risk Treatment Plan

## Protect

improve your OT security controls with tailored consulting, training and design & integration services

### \* OT & Framework Consulting

Mitigate the security risks in your OT infrastructure with the right policies + framework according to your business needs and your compliance requirements

### \* OT Security Design

Development of the security solution design based on customer requirements, our industry expertise, best practices and national/international standards

### \* OT Security Integration

Implementation + integration of the security solution for your business needs, by experienced experts with up-to-date knowledge about OT security solutions and technologies

### \* OT Security Training

Tailored training + awareness services including Cyber Incident Games and Exercises to establish the needed skills and knowledge in your organisation for security threats and needed countermeasures

## Manage

Protective monitoring and continuous improvements of security based on tailored managed security services

### \* SOC 4.0

Security Operations Centre (SOC) solution with full IT/OT coverage provides end-to-end protective monitoring of your industrial environment + optional add-on services depending on your needs

### \* Managed OT Security

Managed service for the maintenance + operation of your OT security infrastructure solutions including implementation and continuous updates of the security controls

### \* OT Cyber on Demand

Tailored on demand security services with a contractual framework consisting of agreed predefined services focusing on flexibility and fast response times

## Helping critical infrastructure and industry

to build and maintain the CyberResilience they need.

# We're passionate about

- > risk management
- > safety
- > security
- > sustainability.

Our experts guide clients in their transformation while empowering them to build a better future.

Airbus Protect offers end-to-end strategic advisory, consulting services, training programmes, and software solutions to industry, Critical National Infrastructure, governments and institutions.

We bring together **1,200 professionals** from Airbus CyberSecurity – one of Europe's most advanced sovereign cybersecurity players, and APSYS – a leading provider of safety, security and sustainability consulting, IT and business solutions – creating a centre of excellence to meet our clients' evolving needs.

We are a trusted partner with more than **35 years of experience** in making businesses safe, secure and sustainable for today and tomorrow.

**Our mission** is to use our deep knowledge and diverse industry expertise to make a meaningful impact. We enable our clients to concentrate on growing their businesses and building a trusted future, while ensuring their safety, security and sustainability never wavers.

We are dedicated to our employees and our clients. Our relationships are based on deep trust empowering us to tackle complex projects and co-innovate **to build a better future.**
